

**DEPARTMENT OF TOXIC SUBSTANCES CONTROL
HAZARDOUS WASTE MANAGEMENT PROGRAM
MANAGEMENT MEMO RESCISSION DOCUMENT**

MANAGEMENT MEMO: #EO-87-009-MM

TITLE: Treatment Technologies At Leaking Underground Fuel Tank Sites

AFFECTED PROGRAMS: Hazardous Waste Management Program (Permitting Division) and the Science, Pollution Prevention & Technology Program

STATEMENT OF RESCISSION:

Management Memo #EO-87-009-MM is hereby rescinded for the following reason(s):

This management memo addresses the evaluation and permitting of innovative technologies for leaking underground fuel tank (LUFT) sites. The Department of Toxic Substances Control (DTSC) no longer has primary authority for remediation of LUFT site. This is now the primary responsibility of the State Water Resources Control Board (SWRCB) and/or the local enforcement agency under delegation of the SWRCB. The Science, Pollution Prevention & Technology Program (SPPTD), which evaluates innovative technologies primarily intended for use at sites or facilities that DTSC oversees, no longer evaluates treatment technologies specifically intended for LUFT sites.
